THE PURPOSE OF THE SCHOOL.

The State Normal School was created by the Legislature for the special purpose of instructing and training teachers for the public schools of the State.

It is a part of the School System of the State.

The institution seeks to accomplish its purpose by thorough reviews, and by instruction in all the branches taught in the public schools; by observation and actual practice in the training schools connected with the Normal School; by a careful study of the objects and methods of education as determined by an analysis of mind, and as confirmed by intelligent experience; by a study and comprehension of the origin and the object of the Public School System of the State; by a study and comprehension of the relations of the teacher to the school, to the community and to the State; and by the *professional spirit* which it seeks to awaken in the student.

THE COURSE OF INSTRUCTION

Includes the subjects required by law to be taught in the public schools, and also the elements of those branches of science and philosophy, the need of which is daily felt by the people in their industrial, social, and political relations.

The character of the instruction is thorough and practical. It keeps constantly in view the wants of the teacher.

The foregoing table shows the terms during which the study of any given subject may be pursued by classes entering at the beginning of any term in the year.

It will be seen that classes entering at the opening of a Fall term may remain out and teach during the Fall term of the third year, return at the beginning of the next term and complete the course by the close of the year.

Classes entering at the opening of the Winter term can pursue the studies in the order indicated in the table, and thus complete the course within eight consecutive terms from the time of entering.

Classes entering at the opening of the Spring term may pursue the regular course for four terms, teach during the Fall term, return for two terms more, teach a second Fall term, return for the remaining two terms and graduate with a regular class.

These plans are suggested for each class as a whole, but it will be observed that any student, entering at the beginning of any term, who has done, satisfactorily, one or more terms' work may remain out and teach one or more terms at any time, and returning, find a class doing the work for which he is prepared.

By following this plan, energetic students can work their way through the school. Such persons, when they have completed the course, are not only prepared theoretically for responsible positions, but they have had practical experience in organizing, instructing, and managing schools. The graduate of the Normal School, *who has had successful experience in teaching, is always in demand.*

CONDITIONS OF ADMISSION.

Students, if females, must be sixteen years of age; if males, eighteen. They must possess good moral character and average intellectual abilities. If residents of Indiana, they must promise to teach, if practicable, in the common schools of the State, a period equal to twice that spent as pupils in the Normal School.

They must pass a fair examination in Reading, Spelling, Geography, and Arithmetic through Percentage. They must write a legible hand, and be able to analyze and parse simple sentences.

EXPENSES.

Board, including fuel and lights, can be had in good families at \$3.00 to \$4.50 per week, according to quality of accommodations.

By renting rooms and boarding themselves, students reduce their expenses for boarding to \$2.50 per week, and even to less.

There are *good facilities for self-boarding* and for *club-boarding* in the city.

Good club-boarding is obtained at a cost of \$1.75 to \$2.50 per week.

WHAT TO DO ON ARRIVING.

Any one coming as a student, and unacquainted in the city, can report himself at the Normal Building at any seasonable hour, where some one will be found to give needed information in regard to boarding.

Students arriving by night trains, will find suitable accommodations at the Terre Haute House and the National House, which are on the line of the street railroad.

TIME OF THE COURSE OF INSTRUCTION.

The course of instruction can be completed by the *average* student in eight terms; by *abler* students in less time.

It is *not* necessary that the student should prosecute his studies during consecutive terms. He may attend one or more terms, stop to teach a term or more, then continue his studies.

BOOKS.

Students should bring with them such standard text books as they have on the common school branches, for the purpose of reference.

LIBRARIES.

There are good reference libraries in the school to which students have access without charge.

To know how to use books is an important part of the teacher's education. Attention is given to this matter.

SPECIAL ATTENTION

Is called to the following points:

1. Tuition is free, and there are no incidental fees.
2. The instruction is systematic, philosophic, and organic.
3. The discipline is such as to lead the pupil to self-government and to the formation of a worthy character.
4. Two good literary societies are in successful operation.
5. *Observation and Practice* in the Training Schools.—Students are required to *observe* until they can accurately report and interpret the meaning of each exercise; to practice teaching under criticism until they can plan and conduct recitations and manage classes efficiently.
6. Successful *undergraduates* obtain good situations at good wages.
7. *Graduates* are commanding from \$50 to \$140 per month.
8. The diploma of the Normal School is, by law of the State, equivalent to a State certificate, relieving the holder from county examinations.
9. For those who can attend but one term, and who are qualified to receive it, a special course of instruction in methods of teaching, in organizing, classifying, and managing schools will be given at the beginning of the spring and fall terms.
10. No student will be admitted to the Normal School who does not intend, *in good faith*, to qualify *himself or herself* to teach in the public schools of the State.

11. It is important that every student expecting to attend the Normal School should be present the *first day* of the term, that all may be examined at once and classified. Those who enter a few days *after* the beginning of a term, take, in their examination, the time of teachers which should be given to instruction. Besides, those who are tardy at entering, find it difficult to "make up" lost lessons.

12. Every student admitted to the Institution will be required to give satisfactory evidence of a good moral character, and of fair intellectual abilities. The personal appearance and the conduct of the individual, together with a letter from some responsible citizen of known integrity, to whom the bearer is personally known, will be taken as evidence in reference to character.

13. After *reasonable* trial, if a student shows lack of ability, or of application, or of moral character, to achieve fair success as a student and a teacher, *he* or *she* will be kindly advised to withdraw from the school and seek some other occupation.

14. Those desiring other information respecting the Normal School, *than that contained in this Catalogue*, are requested to write to the President.
