## STATISTICS.

During the past year eighty-six counties of the State have had representatives in the school, as follows:

|                       |    |                      |    |                       |     |
|-----------------------|----|----------------------|----|-----------------------|-----|
| Adams . . . . .       | 1  | Hendricks . . . . .  | 33 | Pike . . . . .        | 2   |
| Allen . . . . .       | 0  | Henry . . . . .      | 55 | Porter . . . . .      | 0   |
| Bartholomew . . . . . | 6  | Howard . . . . .     | 41 | Posey . . . . .       | 5   |
| Benton . . . . .      | 13 | Huntington. . . . .  | 31 | Pulaski . . . . .     | 7   |
| Blackford . . . . .   | 4  | Jackson . . . . .    | 9  | Putnam . . . . .      | 42  |
| Boone . . . . .       | 32 | Jasper . . . . .     | 4  | Randolph . . . . .    | 6   |
| Brown . . . . .       | 7  | Jay . . . . .        | 4  | Ripley . . . . .      | 2   |
| Carroll . . . . .     | 30 | Jefferson . . . . .  | 7  | Rush . . . . .        | 3   |
| Cass. . . . .         | 21 | Jennings . . . . .   | 2  | Scott . . . . .       | 3   |
| Clark . . . . .       | 15 | Johnson . . . . .    | 7  | Shelby . . . . .      | 9   |
| Clay . . . . .        | 13 | Knox . . . . .       | 16 | Spencer . . . . .     | 7   |
| Clinton . . . . .     | 15 | Kosciusko . . . . .  | 9  | Starke . . . . .      | 2   |
| Crawford . . . . .    | 0  | Lagrange . . . . .   | 9  | Steuben . . . . .     | 0   |
| Daviess . . . . .     | 7  | Lake. . . . .        | 1  | St. Joseph . . . . .  | 1   |
| Dearborn . . . . .    | 5  | Laporte . . . . .    | 2  | Sullivan . . . . .    | 23  |
| Decatur . . . . .     | 1  | Lawrence . . . . .   | 7  | Switzerland . . . . . | 5   |
| Dekalb . . . . .      | 1  | Madison . . . . .    | 37 | Tippecanoe . . . . .  | 10  |
| Delaware . . . . .    | 8  | Marion . . . . .     | 20 | Tipton . . . . .      | 14  |
| Dubois . . . . .      | 3  | Marshall . . . . .   | 2  | Union . . . . .       | 1   |
| Elkhart . . . . .     | 0  | Martin . . . . .     | 1  | Vanderburgh . . . . . | 2   |
| Fayette . . . . .     | 9  | Miami . . . . .      | 9  | Vermillion. . . . .   | 14  |
| Floyd. . . . .        | 4  | Monroe . . . . .     | 0  | Vigo . . . . .        | 181 |
| Fountain . . . . .    | 9  | Montgomery . . . . . | 17 | Wabash . . . . .      | 62  |
| Franklin . . . . .    | 50 | Morgan . . . . .     | 52 | Warren . . . . .      | 7   |
| Fulton . . . . .      | 12 | Newton . . . . .     | 9  | Warrick . . . . .     | 19  |
| Gibson . . . . .      | 10 | Noble . . . . .      | 2  | Washington . . . . .  | 7   |
| Grant . . . . .       | 4  | Ohio. . . . .        | 2  | Wayne . . . . .       | 29  |
| Greene . . . . .      | 9  | Orange . . . . .     | 7  | Wells . . . . .       | 9   |
| Hamilton . . . . .    | 3  | Owen . . . . .       | 37 | White . . . . .       | 14  |
| Hancock . . . . .     | 16 | Parke . . . . .      | 21 | Whitley . . . . .     | 10  |
| Harrison . . . . .    | 4  | Perry . . . . .      | 3  |                       |     |

The attendance from Vigo county includes many who have removed to Terre Haute from other counties to have the advantages of the school.

Since the opening of the school, in 1870, the counties have been represented as follows:

|                       |     |                      |     |                       |      |
|-----------------------|-----|----------------------|-----|-----------------------|------|
| Adams . . . . .       | 11  | Hendricks . . . . .  | 295 | Pike . . . . .        | 25   |
| Allen . . . . .       | 18  | Henry . . . . .      | 201 | Porter . . . . .      | 1    |
| Bartholomew . . . . . | 68  | Howard . . . . .     | 162 | Posey . . . . .       | 113  |
| Benton . . . . .      | 120 | Huntington . . . . . | 183 | Pulaski . . . . .     | 62   |
| Blackford . . . . .   | 19  | Jackson . . . . .    | 59  | Putnam . . . . .      | 257  |
| Boone . . . . .       | 221 | Jasper . . . . .     | 51  | Randolph . . . . .    | 61   |
| Brown . . . . .       | 28  | Jay . . . . .        | 25  | Ripley . . . . .      | 24   |
| Carroll . . . . .     | 177 | Jefferson . . . . .  | 87  | Rush . . . . .        | 71   |
| Cass . . . . .        | 139 | Jennings . . . . .   | 33  | Scott . . . . .       | 39   |
| Clark . . . . .       | 103 | Johnson . . . . .    | 96  | Shelby . . . . .      | 68   |
| Clay . . . . .        | 170 | Knox . . . . .       | 135 | Spencer . . . . .     | 75   |
| Clinton . . . . .     | 150 | Kosciusko . . . . .  | 92  | Starke . . . . .      | 13   |
| Crawford . . . . .    | 11  | Lagrange . . . . .   | 56  | Steuben . . . . .     | 2    |
| Daviess . . . . .     | 46  | Lake . . . . .       | 13  | St. Joseph . . . . .  | 45   |
| Dearborn . . . . .    | 69  | Laporte . . . . .    | 15  | Sullivan . . . . .    | 203  |
| Decatur . . . . .     | 58  | Lawrence . . . . .   | 71  | Switzerland . . . . . | 71   |
| Dekalb . . . . .      | 19  | Madison . . . . .    | 110 | Tippecanoe . . . . .  | 149  |
| Delaware . . . . .    | 89  | Marion . . . . .     | 208 | Tipton . . . . .      | 56   |
| Dubois . . . . .      | 39  | Marshall . . . . .   | 17  | Union . . . . .       | 14   |
| Elkhart . . . . .     | 33  | Martin . . . . .     | 20  | Vanderburgh . . . . . | 73   |
| Fayette . . . . .     | 58  | Miami . . . . .      | 122 | Vermillion . . . . .  | 213  |
| Floyd . . . . .       | 56  | Monroe . . . . .     | 19  | Vigo . . . . .        | 1646 |
| Fountain . . . . .    | 97  | Montgomery . . . . . | 145 | Wabash . . . . .      | 381  |
| Franklin . . . . .    | 100 | Morgan . . . . .     | 208 | Warren . . . . .      | 96   |
| Fulton . . . . .      | 80  | Newton . . . . .     | 68  | Warrick . . . . .     | 148  |
| Gibson . . . . .      | 88  | Noble . . . . .      | 43  | Washington . . . . .  | 45   |
| Grant . . . . .       | 78  | Ohio . . . . .       | 13  | Wayne . . . . .       | 131  |
| Greene . . . . .      | 97  | Orange . . . . .     | 33  | Wells . . . . .       | 65   |
| Hamilton . . . . .    | 54  | Owen . . . . .       | 196 | White . . . . .       | 86   |
| Hancock . . . . .     | 97  | Parke . . . . .      | 313 | Whitley . . . . .     | 27   |
| Harrison . . . . .    | 28  | Perry . . . . .      | 28  |                       |      |

The following table exhibits the number enrolled during each term since the organization of the school, the average term enrollment, and the whole number of different students for the year:

| YEAR.             | ENROLLMENT. |              |              |        | Average Term Enrollment. | Whole No. of Different Students. |
|-------------------|-------------|--------------|--------------|--------|--------------------------|----------------------------------|
|                   | Fall Term.  | Winter Term. | Spring Term. | Total. |                          |                                  |
| 1870 . . . . .    |             | 40           | 66           | 106    | 53                       | 66                               |

Total number of different students since the organization of the school, 10,220.

## FOUR YEARS' COURSE.

|              |            |                                                 |                                              |              |                            |                |
|--------------|------------|-------------------------------------------------|----------------------------------------------|--------------|----------------------------|----------------|
| FIRST YEAR.  | 1st Term.  | *Physical Geography.                            | *Reading.                                    | *Arithmetic. | *English Grammar.          | *Penmanship.   |
|              | 2d Term.   | *Physical Geography.                            | *Reading.                                    | *Arithmetic. | *English Grammar.          | Vocal Music.   |
|              | 3d Term.   | Political Geography with Map Drawing.           | *United States History.                      | *Physiology. | *Rhetoric and Composition. | Vocal Music.   |
| SECOND YEAR. | 4th Term.  | *Educational Psychology. (Gen. Nature of Mind.) | *United States History.                      | *Physiology. | Rhetoric and Composition.  | Latin. German. |
|              | 5th Term.  | *Educational Psychology. (Stages of Knowing.)   | Chemistry.                                   | Drawing.     | Rhetoric and Composition.  | Latin. German. |
|              | 6th Term.  | *Educational Psychology. (Feeling.)             | Chemistry.                                   | Botany.      | Drawing.                   | Latin. German. |
| THIRD YEAR.  | 7th Term.  | *Educational Psychology. (Will.)                | Chemistry.                                   | Algebra.     | General History.           | Latin. German. |
|              | 8th Term.  | *Theory of the School.                          | *Methods. (Language Reading and Arithmetic.) | Algebra.     | General History.           | Latin. German. |
|              | 9th Term.  | *History and Philosophy of Education.           | *Methods. (Geography and History.)           | Algebra.     | General History.           | Latin. German. |
| FOURTH YEAR. | 10th Term. | *History and Philosophy of Education.           | Zoölogy. Physics.                            | Geometry.    | Literature.                | Latin. German. |
|              | 11th Term. | *History and Philosophy of Education.           | Zoölogy. Physics.                            | Geometry.    | Literature.                | Latin. German. |
|              | 12th Term. | *Practice in Training School.                   | Zoölogy. Physics.                            | Geometry.    | Literature.                | Latin. German. |

Fifty credits are necessary to complete this course. The subjects marked thus \* are required; the other subjects are elective.

All students are required to present a satisfactory thesis before graduating.

COURSE FOR GRADUATES OF COMMISSIONED HIGH  
SCHOOLS.

(THREE YEARS.)

|              |            |                                                    |                                              |              |                            |                |
|--------------|------------|----------------------------------------------------|----------------------------------------------|--------------|----------------------------|----------------|
| FIRST YEAR.  | 1st Term.  | *Physical Geography.                               | *Reading.                                    | *Arithmetic. | *English Grammar.          | *Penmanship.   |
|              | 2d Term.   | *Physical Geography.                               | *Reading.                                    | *Arithmetic. | *English Grammar.          | Vocal Music.   |
|              | 3d Term.   | Political Geography, with Map Drawing.             | *United States History.                      | *Physiology. | *Rhetoric and Composition. | Vocal Music.   |
| SECOND YEAR. | 4th Term.  | *Educational Psychology. (General Nature of Mind.) | *United States History.                      | *Physiology. | Rhetoric and Composition.  | Latin. German. |
|              | 5th Term.  | *Educational Psychology. (Stages of Knowing.)      | Chemistry.                                   | Drawing.     | Rhetoric and Composition.  | Latin. German. |
|              | 6th Term.  | *Educational Psychology. (Feeling.)                | Chemistry.                                   | Botany.      | Drawing.                   | Latin. German. |
| THIRD YEAR.  | 7th Term.  | *Educational Psychology. (Will.)                   | Chemistry.                                   | Algebra.     | General History.           | Latin. German. |
|              | 8th Term.  | *Theory of the School.                             | *Methods (Language, Reading and Arithmetic.) | Algebra.     | General History.           | Latin. German. |
|              | 9th Term.  | *History and Philosophy of Education.              | *Methods (Geography and History.)            | Algebra.     | General History.           | Latin. German. |
| FOURTH YEAR. | 10th Term. | *History and Philosophy of Education.              | Zoölogy. Physics.                            | Geometry.    | Literature.                | Latin. German. |
|              | 11th Term. | *History and Philosophy of Education.              | Zoölogy. Physics.                            | Geometry.    | Literature.                | Latin. German. |
|              | 13th Term. | *Practice Training School.                         | Zoölogy. Physics.                            | Geometry.    | Literature.                | Latin. German. |

Thirty-seven credits are necessary to complete this course.

The subjects marked \* are required; the remaining subjects may be elected by the student. All students are required to present a satisfactory thesis before graduating.

## COURSE FOR PERSONS HOLDING THREE YEARS' COUNTY LICENSE.

(THREE YEARS.)

|              |            |                                                    |                                               |           |                            |                |

## Explanation of Courses of Study.

---

The State Normal School maintains four courses of study, as follows: (1) A four years' course; (2) an abridgment of this course for graduates of commissioned high schools; (3) an abridgment of the same course for persons holding one or more three years' licenses; and (4) a course for college graduates.

The course of four years embraces all the subjects that are found in any and all the courses provided. It is designed to meet the needs of those persons that enter the school having the minimum scholarship. The object of this course is to give as thorough and complete a preparation for common school teaching as can be conferred in the period named. It will be noticed that the course includes much more work than can be done in four years; but the student of average ability, and who possesses a fair knowledge of the common school branches on entering can make credits enough in four years to graduate. Fifty credits are necessary to graduation. In this number penmanship and music are included, and may be taken as fifth studies. Four subjects carried successfully throughout the course, with music and penmanship each one term as fifth studies, gives the required credits for graduation. The common school branches and the entire line of professional work are required—about two years. The remaining subjects necessary to graduation may be elected by the student, with the advice of the faculty.

The course of three years for graduates of commissioned high schools is the same as the four years' course, except that such graduates are given a credit of one year—thirteen credits—and are thus enabled to graduate in three years. Such graduates are required to take the common school branches, and the entire professional work of the course. The remaining subjects may be elected by the student, with the advice of the faculty. Thirty-seven credits are necessary to graduation in this course.

A second three years' course is provided for those persons who possess a thorough knowledge of the common school branches. The following action of the board of trustees will show what class of teachers are entitled to take this course :

*“Resolved, That hereafter all students shall be excused from pursuing in the Normal school the eight legal or common school branches who hold one or more three years' county licenses to teach in Indiana. Provided, That if, in attempting the professional subjects of the course and the advanced academic subjects, it should be discovered that any person of the class described is deficient in the common school branches, such person shall not be graduated until this deficiency has been made good by thorough study of the given subject or subjects in the Normal school. And, provided further, That no county license shall be accepted as evidence of adequate scholarship in the common school branches which shall not have been issued within the five years immediately preceding the date of entering the Normal school.”*

The course of one year for college graduates has been organized to meet the needs of those graduates of colleges and universities who wish to enter the field of teaching and superintending schools, and who feel the need of professional training for this work. It will be noticed that the instruction is of a strictly professional character. In planning this course it is assumed that the student has a liberal and accurate knowledge of the subjects required to be taught in the public graded and high schools. It is further assumed that this academic knowledge and training, important and necessary as it is, does not alone qualify one for the delicate and responsible work of teaching and managing schools. It is sought, therefore, to give the student that professional knowledge and skill that belong peculiarly to the teaching profession. Only such persons are eligible to this course as have graduated from some college or university, maintaining a thorough college course of not less than four years.

The courses of study are planned for students of average ability and attainments. Persons of greater ability and attainments can complete the course in less than four years; those of less ability and scholarship will need more than four years to graduate.

## HIGH SCHOOL.

The following are the High Schools of the State whose graduates are entitled to a year's credit on the course :

| CITY OR TOWN.            | COUNTY.               | SUPERINTENDENT.     |
|--------------------------|-----------------------|---------------------|
| Albion . . . . .         | Noble . . . . .       | W. B. Van Gorder.   |
| Amboy . . . . .          | Miami . . . . .       | J. Z. A. McCaughan. |
| Anderson . . . . .       | Madison . . . . .     | J. W. Carr.         |
| Andrews . . . . .        | Huntington . . . . .  | J. C. Comstock.     |
| Attica . . . . .         | Fountain . . . . .    | W. H. Hershman.     |
| Auburn . . . . .         | Dekalb . . . . .      | B. B. Harrison.     |
| Aurora . . . . .         | Dearborn . . . . .    | R. W. Wood.         |
| Bedford . . . . .        | Lawrence . . . . .    | C. S. Thomas.       |
| Bloomfield . . . . .     | Greene . . . . .      | C. Danielson.       |
| Bloomington . . . . .    | Monroe . . . . .      |                     |
| Bluffton . . . . .       | Wells . . . . .       | W. P. Burris.       |
| Boonville . . . . .      | Warrick . . . . .     | Charles E. Clark.   |

## REPORTS OF DEPARTMENTS.

---

A very brief statement is herewith presented by the various heads of departments concerning the instruction given in their respective subjects. Only the most general idea of the scope and character of the work done can be set forth in so small compass.

---

### DEPARTMENT OF HISTORY AND PHILOSOPHY OF EDUCATION.

The time given to this subject is one year, forty weeks, five lessons per week. The subject is placed late in the course, as it deals with abstract and difficult topics; as also for the reason that it presupposes the instruction in psychology and methods presented earlier in the course. The instruction given in the professional subjects of the course is the work most distinctive and characteristic of the school. The history and philosophy of education lies in this field of professional instruction and training. The general aim is to give the student a thorough philosophical understanding of the principles of education, and to give him a general outline of the world's educational history. It is assumed that education is a science, at least in the general view that all the work of the school can be based on reasons, generalizations or principles which are rationally determined. It investigates the subject of education for the purpose of discovering and mastering these general truths, which it conceives to underlie all correct educational practice. While not ignoring the many valuable treatises on the science and history of education that are available for class use, the work of this department

is largely devoted to a verification of educational principles through reflection and appeal to experience. Constant reference is had to the treatises on these subjects contained in the library, and one object is to give the student some acquaintance with the best standard authorities on the subject of education considered in its more reflective and philosophical aspects. Effort is made to free the student from dependence on mere authority and individual experiment in the school-room, by leading him to a liberal knowledge and grasp of fundamental educational ideas. In the historical phases of the subject, effort is made to see the great educational epochs which the history of the race exhibits; also to make such study as is practicable of specific educational movements and reforms that possess permanent interest and value to the student and teacher. In this connection attention is paid to the systems of educational doctrine worked out by the world's greatest thinkers and writers on the subject.

As indicating somewhat the scope and character of the work of this department, the following subjects are mentioned as among those that receive attention :

1. Education considered (a) as an art, (b) as a science, (c) in its philosophical aspects.
2. The presupposition of education—an orderly, systematic (rational) world; a being essentially rational in nature.
3. Explanations of the existing world order—Atheistic; Pantheistic; Theistic; etc. Grounds of the theistic view.
4. Man's essential nature as a rational being. Man's place in nature.
5. Why man is the only being that can be educated.
6. Difference between special, professional or technical education, and liberal or general education and culture.
7. Nature, form and limits of the educating process.
8. Data of educational science.
9. Triple nature of the being to be educated.
10. Nature, aims and means of physical culture.
11. Intellectual education.
12. Culture of the ethical nature.
13. Religion and the school.

14. Relation of the school to other educational agencies.
15. Educational values.
16. Historical epochs of education, (a) oriental world, (b) education in Greece and Rome, (c) modern education.
17. Education in the United States.
18. Indiana's educational system—its excellencies and defects.

W. W. PARSONS,  
*Head of Department.*

---

## PSYCHOLOGY.

INCLUDING, AS APPLIED PSYCHOLOGY, THE THEORY OF THE SCHOOL, METHODS, AND PRACTICE.

The work of the department begins in the fourth term of the course, and continues for eight terms. The first four terms are devoted to the discussion of psychology; the remaining four terms to the discussion of the relation of psychology to the school as an organization to methods and to practice.

*Psychology.* The work in Psychology consists of two main lines. The first is the historical aspect of psychology in its relation to philosophy, presented in lecture form on Monday of each week. The students take notes of the lectures, do collateral reading, and at the end of each term take an examination. The work begins with a brief consideration of oriental thought. It then treats the history of philosophy in its relation to psychology, beginning with Ionic philosophy, and ending with that of Herbert Spencer. (For the collateral reading the student should possess some such work as Schwegler's History of Philosophy. Published by D. Appleton & Co., New York.)

The second line of work accompanies the first. It is in the form of investigation, recitation and discussion; and to it are devoted Tuesday, Wednesday, Thursday and Friday of each week throughout the course, except on Tuesdays of the last three terms. The aim is to investigate the phenomena of consciousness and to organize the subject in its educational bearing under the head of Educational Psychology.

At the beginning of the first term's work the attempt is made to discover, by the examination of particulars, the essential mark of psychological phenomena. On this basis the students think out the scope, divisions, and their relative importance, the modes of approach to the subject matter, and the movements of thought in the investigation. In considering the divisions the student makes a general examination of the nature and scope of animal psychology, infant psychology, experimental psychology, etc., and prepares a bibliography for each division. With this work as a basis, the attention is centered upon the phenomena of human consciousness in its normal activity. The primordial tendencies to diversify and to unify are studied and illustrated as exhibited in apperception and retention. This is intended to render evident the phases of any complete mental act, the essential form of an act of knowing, and the general stages in knowing. From this investigation the student discovers that the essential attribute of mind is growth in freedom, and on the basis of this principle the distinctive work of educational psychology is given its general organization. [The text book used as a basis for the foregoing investigation is "Psychology," by Dr. John Dewey, published by Harper & Brothers, New York. For collateral reading, "James's Psychology" (smaller edition), and "Apperception," by T. G. Rooper, C. W. Bardeen, Syracuse, N. Y., are recommended.]

In the second term, the general nature of Logic, in its relation to the psychology of knowledge and belief, is studied. This subject matter will be presented on Tuesday of each week; second, the mode of examining historically any one of the stages of knowing and of investigating it as to growth in freedom, is thought out.

In the third term is considered, first, the general nature of Aesthetics, in relation to the psychology of feeling (Tuesdays), and, second, the investigation of Feeling and its stages of growth.

In the fourth term are discussed the general nature of Ethics in relation to the psychology of the will (Tuesdays), and the stages of the growth of will.

*The Theory of the School.* In the fifth term the students begin

to examine the school as one of the social institutions, seeking to find, first, the fundamental principle which it possesses in common with all the other institutions—church, state, industrial institutions, etc.

The distinctive place of the school is more closely apprehended by a study of this institution in its relation to the family and to the kindergarten. The school itself is then examined as to the subject matter dealt with, purpose, steps or stages in its work, and instrumentalities employed, including the course of study, and the school system as the external manifestation of the thought of the institution.

Under this last point will be taken a careful study of the school system of Indiana, and of various other national and state systems; as, *e. g.*, those of Prussia, Austria, France, Massachusetts, California, Michigan.

**METHOD.** The first work under this subject is the discussion of general method. This general conception of method is illustrated in various common school subjects, as language, reading, geography, history, etc., distinguishing clearly throughout between method as a mental process, and the devices determined thereby.

**PRACTICE.** The practice work consists of observation and teaching in the practice schools. The pupils taught are children belonging to the regular grades of the Terre Haute city school system.

The work consists of the following phases:

1. Lessons given on certain days by the students in the presence of the practice class as a whole.
2. Lessons given each day at different hours when the practice class as a whole is not present.
3. The observation of lessons given by the critic teachers in charge of the room.

On the day succeeding the presentation, the lesson given by the student is discussed. The lessons taught in the presence of the students by the critic teacher are given:

1. For the purpose of setting before the student more artistic presentations of the lessons than they have been able to attain.

2. In order to test the power in and confer skill in the interpretation of lessons.

In connection with the practice and observation work in each grade the teacher in charge of the room makes careful explanations of the details of the work, the organization of the school, the programme, etc.

HOWARD SANDISON.

*Head of Department.*

---

### GERMAN.

The course in German is planned not only with a view to making a substantial addition to the student's direct teaching equipment, but also for the purpose of making the study a most valuable instrument of his personal culture. It is believed that the student who desires to teach German will, upon the satisfactory completion of the course, find his preparation adequate to the requirements of the public schools of the State. In addition to this he will have acquired some freedom of access to the rich store house of German literature in which are to be found many of the world's choicest productions of literary genius. In a professional school of pedagogics access to this literature is especially desirable because of the exceptionally valuable contribution which German writers have made to the discussion of all aspects and phases of educational doctrine.

*First Year.*—The first year will be devoted to the study of German orthoepy, orthography, chirography, to the acquisition of a German vocabulary, and to the study of German inflectional systems and German syntax. Throughout the year the student will have constant practice in the preparation of written translation exercises graded to his proficiency in the language.

*Second Year.*—During the second year the student will give much less of his time to the study of grammatical forms and more to the reading of connected German discourse, advancing from simple selections in prose and verse to some typical specimens of German literature.

*Third Year.*—During this year the student will extend his reading to some of the German classics and to the study of one or more representative works on pedagogics.

MICHAEL SEILER,  
*Head of Department.*

---

### LATIN.

In this department, students have opportunity to acquire a good knowledge of the Latin language, and to become fairly well acquainted with its literature. It is the aim to conduct the work so as to secure, on the part of the student, efficiency in teaching, and as high a degree of mental discipline as possible; while making the subject a valuable aid to the study of English and other subjects more or less closely related. Latin is elective, and one or more terms' work in the subject may be substituted for other elective work.

In the fourth year a student may devote one-half of his time to the study of Latin, thus making it possible for him to do four years' work upon this subject. Students begin the study of Latin with the fourth term, using Collar & Daniell's *Beginners' Latin Book* (published by Ginn & Co.). This book is used somewhat more than two terms and is made the basis of the preparation for reading Cæsar. During the sixth and seventh terms portions of Cæsar's *Commentaries* are read. The textbooks used during these two terms are the *Beginner's Book* (continued), *Harkness' Latin Grammar*, *Harkness' Cæsar*, *Cicero and Sallust*. The eighth term, selections from Cicero's *Orations* are studied, and the ninth term, selections from Virgil's *Æneid*. The work of the fourth year will consist of the further study of Cicero and Virgil, together with portions of Livy, Tacitus, Horace, etc., or equivalents.

As an important aid to a thorough knowledge of syntax, writing Latin is practiced in connection with the texts read. The vocabulary and syntax involved in the written exercises are

found, mainly, in the selections read. It is the aim to imitate the author as far as possible.

For the purpose of securing some facility in reading at sight, there will be read from time to time, after the second term's work, extracts from easy Latin authors, such as *Viri Romæ*, Cornelius Nepos, Phædrus, Aulus Geillius, Bennett's Easy Latin Stories, etc.

ALPHEUS McTAGGART,  
*Head of Department.*

---

## HISTORY.

The History work comprises two terms of required work in United States History, and three terms of elective work in General History.

The United States History work is intended to present the growth of American institutions from 1607 to the present time. The political, social, religious, industrial and educational growth are studied as fully as time will permit. This work is carried on both by the use of text-books and also by an extensive use of the library. By this means it is intended to give discipline in laying out fields of work, in criticising this data, in organizing it into its logical connection, and of discovering the method and value of such work. Subjects like the following are investigated: What has been the bearing of slavery upon American institutions? How have internal improvements effected American life? Trace the growth of industrial development in United States History, and show its relation to other phases of development. What is the political value of the study of history? What is the moral value? History of Civil Service and its effect upon American life.

The General History is intended to present a general outline of the growth of institutions from the beginning of General History to the present time. The plan of work and its general aim is not different from that in United States History. By

gaining wider views the student is able to do something in determining the principles which underlie and govern historical growth, and to what extent historical data can be organized into a science.

The first term's History work deals with Greece and Rome. The second, with the middle ages; the third, with Europe since the Reformation.

ELLWOOD W. KEMP,  
*Head of Department.*

---

### MUSIC.

The work in music is divided into two terms of thirteen weeks each, one recitation each day. The first term is devoted to a careful study of first principles, with such musical history as may be found necessary, special attention being given to the formation of good habits in regard to breathing, singing, pronunciation and enunciation.

In the study of relative pitch of musical sounds, the major or diatonic scale is taken as the unit, and by comparison its intervals are carefully studied, thereby laying a good foundation for work in scale formation, chromatic intervals, etc. Particular attention is given to sight singing early in the term, on the principle that people learn to sing by singing. Each pupil is expected to be able to write exercises, introducing in a musical way each new point, thereby proving ability to present the same thought to a class of children when occasion demands.

During the second term particular attention is given to the study of the underlying principles of the leading courses of music for public schools, and the written work is based upon the major triads of the scale. Throughout both terms a systematic study of the lives of the great masters is pursued, and their works are studied in class, choir and chorus.

In either secular or sacred music it is necessary to have a right conception of the thought and emotion expressed before the right quality of tone can be given. Poor singing is more frequently the result of poor thinking than of poor voices. Children will

imitate the right quality of tone just as readily as they will imitate the wrong quality, and it is very desirable that teachers should be able to properly express the sentiment contained in song or hymn. With this end in view, much attention is given to "intelligent doing," as regards singing with expression.

Text-books, charts, piano and blackboards are used when necessary, as aids. No limit is placed upon the amount of work to be done in either term, except as the ability of the several classes may limit it.

CARRIE B. ADAMS,  
*Head of Department.*

### DRAWING AND PENMANSHIP.

The teacher should be able to write legible forms with ease. He should also draw with facility. An intelligent appreciation of the value of penmanship and drawing as instruments of education is also a part of his preparation to teach. The aim of this department is (1) to discuss subject-matter in the field of penmanship and drawing; (2) to view the subject-matter as exercise ground for discipline, and (3) to give all the skill in writing and drawing which the limited time will allow.

*Penmanship.* But one term is given to the study of penmanship. The work includes (1) the study of position and movements; (2) study of the standard forms of letters and their combinations; forms for letter writing and business papers; (3) practice in writing under proper conditions of position, and movement; (4) discussion of educational value of the subject.

*Drawing.* Two terms are given to the study of drawing. The work includes:

1. Study and construction of geometric forms.
2. Working drawings of geometric solids.
3. Decoration.
4. Free hand drawing from models and casts.
5. Composition.
6. Blackboard illustration based on previous work.
7. Discussion of educational value of drawing.

GEORGE W. THOMPSON,  
*Head of Department.*

## PHYSICS AND CHEMISTRY.

## PHYSICS.

The work in physics is one year and covers the ground of general physics. In the recitation work of the first term the subject will be discussed under two heads:

1. *Matter and its properties*, in which special attention is given to a discussion of the molecule, the constitution of matter, physical and chemical changes, force, three states of matter, phenomena of attraction, adhesion, cohesion, capillarity, etc.

2. *Dynamics*, as dynamics of fluids, barometer, specific gravity, motion and laws of, composition and resolution of forces, work and energy, the simple machines, etc.

During the second term the work will cover:

1. *Heat*.—In heat the class will discuss temperature, the modes of heat diffusion, effects of heat, thermometry, and such other points as naturally grow out of such a subject.

2. *Electricity and magnetism*, as current electricity, batteries, effects produced by electricity, electrical measurements, magnets and magnetism, laws of currents, magneto-electricity and current induction, frictional electricity, electrical machines, and applications of electricity.

In the third term the work is divided into two main divisions:

1. *Sound*.—Sound waves, velocity of sound, reflection of sound, loudness, interference, forced and sympathetic vibrations, pitch, vibration of sound, over-tones and harmonics, quality, composition of sonorous vibrations and musical instruments.

2. *Light*.—Reflection, refraction, spectrum analysis, color, interference, refraction and polarization, thermal effects of radiation and optical instruments.

All points in the class work are fully illustrated by experiment so that the student may see verified every principle and law presented. The laboratory work in physics is, as far as possible, quantitative in character, and each student is expected to devote four hours per week to this work in addition to his regular recitation work. The laboratory is well equipped for

work in general physics and each student is given every opportunity to make use of the apparatus. In all of the laboratory experiments careful notes of results obtained are required.

Connected with the work in physics is a work shop supplied with a work bench, a lathe, run by a motor, and full sets of tools, where the students in physics are taught to devise and make pieces of apparatus to illustrate the elementary principles of physics without having to depend upon the use of expensive apparatus made by regular dealers.

#### CHEMISTRY.

As in physics, the work in chemistry is one year. In the first term of the year the class studies general inorganic chemistry. The work consists of daily recitations and laboratory work. It is thought that the correct way to study chemistry is by actual experimentation. The students are required to perform the experiments of the text-book and such other work as may be assigned to them, and bring the results of this work to the lecture room for discussion. Such other illustrative work as is deemed necessary is presented to the class by the teacher.

The work of the second term will deal largely with organic chemistry, and during this term the work in qualitative analysis will begin, extending through the third term. The work in analysis is almost wholly laboratory work—ten hours per week being required of each student. The chemical laboratory is well supplied with every convenience for pursuing the work in chemistry as far as it is carried in this course.

ROBERT G. GILLUM,  
*Head of Department.*

#### MATHEMATICS.

The plan of the work in mathematics includes:

1. A careful organization of the subject.
2. The study of the underlying principles, and their application, in accordance with this organization.

3. A discussion of the mental process involved in such study, and an investigation of the educational value of the subject.

The branches studied and the time given to each are as follows:

Arithmetic, two terms.

Algebra, three terms.

Geometry, three terms.

The addition of one term to the algebra and to the geometry has greatly strengthened the mathematical work. It enables the student to complete Euclidean Geometry, and to prepare himself thoroughly to conduct classes in such lines of algebraic work as properly belong to the high school or academy. The aim of the whole course is the formation of correct mathematical concepts, the training of the judgment and the strengthening of the reasoning powers.

MRS. LIZZIE S. BYERS,  
*Head of Department.*

---

## BIOLOGY.

The work in this department consists of two terms in animal physiology, both of which are required, three terms in Zoölogy and one term in Botany, all of which are electives for persons advanced in the course. Provision is thus made for two solid years of work in Biology, making it possible to become sufficiently acquainted with the elements of the subject to teach the same in our common schools.

It is the aim in the physiology work to study the human body as a working organism, whose various functions are to be determined by scientific observation and experiment. For this reason, the dissection of various animal organs, and examination of microscopic sections forms an *integral part* of the work.

The work in Zoölogy is designed to extend the work in practical physiology, as a better preparation for teaching the same, and in addition acquaint the student with many of those animal

forms which he, as teacher, may use later as subjects of study to train the perceptive faculties of his pupils. The first term is devoted to invertebrates, the second to vertebrates and the third to the embryology of the chick and salamander and the elements of histology.

The Museum of the school contains very many specimens to illustrate the fauna of Indiana, and it is desired to make the Museum a center of exchange with teachers interested in these lines.

The work in Botany is given in the spring term and is devoted to the study of the type forms both from the cryptogamic and phanerogamous fields. In both Zoölogy and Botany nearly all the work is work in the laboratory. No text-book is used though the laboratory has many of the best reference books on all the phases of these subjects which are always available to students. In all these subjects the ends sought to be accomplished are: (1) To present the relations in the subject, and the methods in the study, that the student is enabled to rationally teach the same. (2) To develop in the student the spirit of scientific investigation and inquiry.

The biological laboratory is fairly well equipped with good apparatus, among which may be mentioned thirty-nine compound microscopes, a dozen dissecting microscopes, fifty sets of dissecting instruments, a full-sized French Manikin, of the best make, articulated and disarticulated skeletons, a stereopticon with microscopic attachments, etc. The laboratory accommodates at one time forty students, with desks especially made for biological work.

LOUIS J. RETTGER,  
*Head of Department.*

## THE LIBRARY.

The library at present contains ten thousand volumes. The old library having been entirely destroyed, the books we have are new and carefully selected with reference to the special needs of our school, so that the number alone gives no real conception of its working capacity. A special fund enables us to buy such books as are needed, and the library will have a yearly increase of about fifteen hundred volumes.

The librarian is ready and willing to give all necessary help in the finding and selection of books, but the catalogue and classification will answer all ordinary questions.

## CATALOGUE.

This is arranged on cards in two cases of nine drawers each placed on the platform and near to the librarian's desk. If you wish to find a book of which you know the author's name, look for his surname just as you would look for a word in an English dictionary: *e. g.*, you want a work of Lew Wallace, and so you open the drawer which, as seen from the outside label, contains W, and there in proper alphabetic order will be found the name sought, with entries beneath it on separate cards of his "Ben-Hur" and "Fair God." *The book number will be found on the left hand side of each card.* Again, suppose you want a book on some given subject, say "psychology:" you are to look for psychology after the same manner you found Wallace, and will then find what the library is able to furnish. Once more, if you know the title only, look for the first word of the title.

A book is catalogued by subject under the most specific heading which will contain it: *e. g.*, an arithmetic is entered under the heading ARITHMETIC, not under MATHEMATICS. The last card of a subject bears information of special value in tracing the details of that subject by giving references to the more specific headings to be found in their individual alphabetic order elsewhere in the catalogue: *e. g.*, immediately following the entries of general works under the heading EDUCATION will be

found further references to the more specific phases of the subject, such as CLASSICAL EDUCATION,—COLLEGES,—COMPULSORY EDUCATION,—CULTURE,—DEAF AND DUMB,—DOMESTIC EDUCATION,—ETIQUETTE, etc. The raised blue cards, with printed headings, are mainly guides, showing the progress, or trend of the alphabet, though in addition marking the exact position of a few common subjects.

Care should be taken not to soil the face of the cards, either by unnecessary handling or by attempting to remove them from the case in which they are fastened.

The book number having been obtained, a brief knowledge of the

#### CLASSIFICATION AND SHELF ARRANGEMENT

is necessary in order that the book itself may be found and afterwards be returned to its proper place. Books of a like sort are kept together upon the shelves according to a system called the Dewey decimal classification. There are ten classes, and all book numbers range between 0 and 999.99: General works, 0-99, together with decimal divisions; Philosophy, 100-199; Religion, 200-299; Sociology, 300-399; Philology, 400-499; Natural Science, 500-599; Useful Arts, 600-699; Fine Arts, 700-799; Literature, 800-899; History, Geography and Travels, 900-999. Books numbered from 0 to 151 are in the central part of the north portion of the room; those numbered from 152 to 341, on the north side; from 342 to 799, on the east side; from 800 to 899, on the east side of the long central tier; from 900 to 999, on the west side of the tier, and terminating in the bay window alcove. In each case the books are numbered beginning on the left-hand side of the top shelf. For a larger number than is to be found in that case, proceed to the right, and for a smaller number, to the left.

The number may be a decimal; the book is placed according to the value of the decimal. Thus 540.01 would follow 540, and precede 540.02 or 541. Frequently several books bear the same number; these are then arranged alphabetically by the letters on the lower side of the label. Books too large to go above in their regular places are arranged on the lowest shelf.

They should be placed flush to the edge of the shelf, and in returning books to the shelf, care should be taken not to push other books back and out of place.

#### POOLE'S INDEX.

This is an index to the articles found in the most important magazines and papers published in the English language. Following the preface of each volume is a list of the periodicals indexed; only those checked in red ink are to be had in the State Normal Library.

#### A. L. A. INDEX.

Next to our Card Catalogue and Poole's Index, the American Library Association Index to essays, proceedings of societies, etc., is the most valuable aid in securing references on special subjects. There is a checked list, like that in Poole's Index, in the back part of this volume.

Established mainly in the highest interest of those who use the library there are certain

#### RULES AND REGULATIONS.

1. Commencing at 7:50 o'clock A. M., with an hour and a half's intermission at noon, the library is open each of the weekdays about eight hours, excepting Saturdays, when it is opened at 9 o'clock and closed at noon.

2. Free access to books and periodicals is given during all hours in which the library is open, and by the proper filling out of blanks supplied at the librarian's desk, they may be taken from the room for a period of from one day to two weeks, with the exception of general encyclopedias.

3. Books referred to for work in departmental study, during the period in which they are so used, together with both loose numbers and bound volumes of periodicals, at all times, may be

taken from the library only from the closing until the opening hour; other books may be retained two weeks, and then renewed, provided there is no special demand for them.

4. Each student may have out at one time as many as three books, but no two can be departmental reference-books of the same subject. When the circumstances warrant it, a fourth and even a fifth book, not in demand, may be drawn by a special arrangement.

5. Reference books, of which we have a sufficient number of duplicates to supply each member of a class with a separate copy, may, by expressed permission of the librarian, be drawn for a period of two weeks. This rarely occurs in the third term of the year, since the classes are then too large for the exercise of the privilege.

6. Books retained beyond the limited period can not be renewed.

7. The blank must be filled out by the borrower, and under no circumstances is a book permitted to be taken from the room without being properly charged. When the book is returned, see that you are given credit for it by having the slip canceled; otherwise there is a risk of your having to replace the book or of forfeiting its cost.

8. There is a law of the State against "Whoever shall wilfully or mischievously cut, mark, mutilate, deface, write in or upon" library books. Note books should not be placed inside of books belonging to the Normal Library, and all large and heavy books should be placed on a table while they are being used.

9. Two tables are reserved for those desiring to consult the current periodicals; and the table space in the immediate vicinity of the cases containing the encyclopedias should be kept free for those desiring to consult them. So far as possible, the avenues to the cases, and especially to the cases of general reference books, should be kept open, allowing easy passage to and fro.

10. That our rooms may be kept quiet and thereby afford the best opportunity for study, no communication is allowed, not even during recess, without special permission. Do not leave

the library while the classes are in session unless it is positively necessary to do so.

Finally, it is only by conscientious care and earnest co-operation that the great privilege of unrestricted access to the books can redound to the benefit of all, and we trust that such will be exercised.

ARTHUR CUNNINGHAM,  
*Librarian.*

---

### GEOGRAPHY.

The old geography was almost purely descriptive, and consisted in the location of natural features, the definition of political boundaries, and various statistics in regard to population and products. These things form the barest raw material of geography, and constitute a science no more than do the contents of a city directory. Such study furnishes little training except for the memory, and is singularly uninteresting and fruitless. The new geography aims at a broader and deeper knowledge of the whole world, inquires into the causes and relations of terrestrial phenomena, and seeks to explain present conditions as the outcome of past conditions.

If the earth be regarded as a living organism, exhibiting certain related parts, processes and functions, scientific geography is equivalent to terrestrial morphology and physiology. This view renders possible the synthesis of a very wide range of phenomena which geography shares with other departments of natural science. The foundation of geography lies in a study of the earth as a planet and its relations to the sun and other heavenly bodies. Upon this rests that portion of geography which is becoming specialized under the name of physiography or geomorphology, the science of earth forms, which considers the natural features of the earth's surface, the agents which have produced them, and the successive phases in the cycle of their development. It is a study of relief as an expression of structure, and while strictly geographical, furnishes the starting point for geology. These two sciences occupy in common a wide domain

within whose limits they differ only in purpose and aim. As Mackinder, of Oxford, has expressed it, geography reads the present in the light of the past, while geology reads the past in the light of the present. Geography applies the laws of physics to a study of the oceans of water and air, and is thus enabled to explain the complex conditions of weather and climate. It is the business of geography to turn the light of all science upon this globe, the home of man, to determine every feature, phenomenon and condition which contribute to make human environment what it is, and to crown the work by showing man's relations to that environment.

It is obvious that, while geography furnishes opportunity for original investigation and the application of the scientific method to research, it also possesses, in a large degree, that human interest which renders a subject congenial and attractive to the youthful mind. Hence it is adapted to serve as an introduction to the realm of nature. "It is the open door to all the sciences." With these considerations in view, geography has been placed at the beginning of the Normal course. In the two terms devoted to physical geography, the whole field can not be covered. In the selection of certain portions for special study, regard is had not only to intrinsic importance, but to availability and adaptation to the mental powers of the student. All these considerations point to the common domain of geology and geography as first in order of importance. The first term is devoted to physiography, which is taught by a method as strictly inductive as circumstances permit. The student is made acquainted with common rocks by the examination of hand specimens, and with such geographic forms and processes as the vicinity presents by personal observation. A general knowledge of geomorphology is obtained by a special study of certain types, such as the Mississippi valley, the Colorado cañon, the falls of Niagara, the lakes of North America, the Uinta and Appalachian Mountains, the volcanoes of Stromboli, Vesuvius and Hawaii. Those types are selected concerning which the best information is procurable. The library and museum are brought into constant requisition, and the facts are presented, as far as possible, by means of

models, maps, sections, pictures, and the descriptions of competent eye-witnesses. The apparatus and material available for laboratory work is already considerable, and is being constantly increased. The tendency to theorize is discouraged, and the consideration of remote and general causes is postponed until the largest possible body of facts has been acquired.

In the second term the greater part of the time is given to meteorology, preceded by a study of the ocean, and followed by a brief consideration of the distribution of life. The prime object of this portion of the work is an understanding of the factors and conditions which constitute climate. The method is more experimental as the subject is more distinctly physical. Daily observations of the temperature, pressure, winds, humidity and rainfall are made and compared with the weather maps of the Department of Agriculture. In this connection the astronomical portions of geography are introduced, the distribution of heat being dependent upon the form, attitude and motions of the earth. The geographical distribution of plants and animals is touched upon only in a brief and general manner. The students, as a rule, are not prepared to undertake a scientific and satisfactory study of this subject. As a logical transition and valuable introduction to political geography, attention is given to some portions of anthropology, such as the distribution of races, the primitive condition of man and the successive steps of his development from savagery to civilization.

The third term's work, which is elective, is devoted to political geography, or the present distribution and condition of civilized peoples. This is the ground which geography occupies in common with history; but no confusion arises if geography be treated as the physical basis of history, and the greater stress be laid upon the influence of physical environment as determining industrial, commercial and social conditions. In the time allotted, only the leading peoples of the world can be studied. The United States, the British Empire, the five great powers of Europe, and the Spanish and the Portuguese peoples in both hemispheres comprise nearly the whole civilized world, and are here named in the order of their importance to our students. Innumerable details are classed together in such a manner as to

give the student a broad and comprehensive view of human activities and interests. During this term an attempt is made to construct, both upon paper and in the student's mind, that map which is the ultimate end of all geographical study, a map which will show him in one view the distribution and relation of all terrestrial phenomena.

CHARLES R. DRYER,  
*Head of Department.*

---

### READING AND LITERATURE.

The work of this department consists of two terms of required work in reading and three terms of elective work in literature. The main idea of the whole of this work is to awaken or to strengthen in the student a love of good literature and to make him, as far as possible, self-guiding in the field of literature. This idea is modified by the thought that the student is to use literature as a means of education, and the study is at every point looked at from the teacher's standpoint.

#### READING.

The reading work is confined entirely to the advanced phase. It is the aim to help the student to understand the thought in suitable reading selections, and to appreciate the manner in which that thought is expressed. In carrying out this idea a great many selections from the works of the leading American authors are studied, in every case the complete production being used. The leading principles of literary analysis, laws of style, etc., are, as far as possible, developed inductively. Intelligent oral expression is made an integral part of the work.

The scope of the work is indicated more fully by the following synopsis:

*First Term.*—I. The selections are mainly taken from Whittier, Irving and Longfellow. 1. Several of Whittier's simpler narrative poems and *Snow-Bound* are carefully studied in class, and many others read for special points and reported upon by

students. 2. A detailed study of at least five selections from Irving's Sketch Book and a reading of several others. 3. The selections from Longfellow in this term are confined mainly to his shorter poems, including several of the narratives from the Tales of a Wayside Inn. (Four hours a week.)

II. The problem of literature in the common schools. This discussion is designed especially to help teachers make the most of the children's reading circle, and is mainly in the form of lectures and collateral reading. (One hour a week.)

*Second Term.*—I. The selections used during the term are mainly as follows: 1. Longfellow's *Evangeline*, or *Hiawatha*. 2. Prose selections from Hawthorne, Holmes, Emerson, Lowell, Whittier and Thoreau. 3. Lowell's *Vision of Sir Launfal*, and a group of related poems. 4. One of Shakespeare's plays. During the present year *Julius Cæsar* has been used. (Four hours a week.)

II. A study of George Eliot's *Silas Marner*. (One hour a week.)

#### LITERATURE.

It is the aim of this work to trace, as fully as time will permit, the development of English literature as evidenced by several of the leading literary products of the English mind, and to discover the causes of the changes in literary ideals. Literary history is strictly subordinated to the study of the authors themselves.

*First Term.*—The early literary environment and the Renaissance influences. Special study of Chaucer's *Canterbury Tales*, the first book of Spenser's *Faery Queene*, and four or more of Shakespeare's dramas. (Fall term, five hours a week.)

*Second Term.*—The development of the literature from the Age of Elizabeth down to about 1830. The Puritan influence, the French influence following the Reformation, and the beginnings and progress of the Romantic movement are the main topics considered. The works studied are from some of the following authors: Milton, Dryden, Pope, Addison, Swift, Johnson, Gray, Goldsmith, Burns, Scott, Byron, Coleridge, Wordsworth. (Winter term, five hours a week.)

*Third Term.*—1. A comparative study of Tennyson and Browning. 2. A brief review of the leading features of American literature, with a consideration of present literary condition. (Spring term, five hours a week.)

Throughout the work of the three terms, critiques from Lowell, Carlyle, Arnold, Dowden, Moulton, Minto, and others, on the authors studied, will be read *after* the study of the authors themselves.

---

Head of Department.

---

## GRAMMAR, RHETORIC AND COMPOSITION.

The work of this department consists of two distinct lines, the grammar, and the composition and rhetoric work. It extends through five terms, grammar *one* and *two*, and composition *one*, being required, the other two terms of composition being elective.

### GRAMMAR.

Two terms of thirteen weeks each are given to the study of English grammar. It is the purpose of this work to give the student as thorough a knowledge of the subject-matter as the time will permit, and to have him look at the points presented from the teacher's standpoint, seeing how he may best adapt them to the development of those minds which he is to train.

*First Term.*—The sentence is first studied as a whole in relation to the thought, then as made up of three essential parts, each corresponding to that part of the thought which it expresses. Having studied the essential elements to see what they express and how they are composed, the various modifiers are taken and their essential characteristics clearly worked out. Simple sentences containing these different kinds of elements are carefully analyzed, and then a special study of the complex sentence is made.

*Second Term.*—In this term there is a thorough discussion of the participle, infinitive, and parts of speech; their use in the sentence and their properties as growing out of this use receiving especial attention.

Throughout the work of both terms, attention is given to the formation of good habits in the use of pure English.

#### RHETORIC AND COMPOSITION.

Throughout the three terms given to this line of work, the composition and rhetoric are combined; the principles underlying the construction of discourse are first studied and then their practical application is made by the student in his composition writing.

*First Term.* The principles of punctuation, with considerable practice in the use of the various marks; letter writing; the principles of style, with a thorough study of sentences exemplifying those principles which are necessary to effective discourse, are studied in this term. Genung's "Outlines of Rhetoric" is used as a text, and in connection with it Herbert Spencer's "Philosophy of Style."

*Second Term.* The first part of the term is used in a consideration of the paragraph, both the isolated and the related, since nearly every principle underlying the discourse as a whole is found in the paragraph. Typical paragraphs of the various kinds—the descriptive, narrative, expository, and argumentative—are studied with practice in outlining and constructing them. Description and narration are studied in the latter half of the term, and as much written work is done by the student as the time will permit.

*Third Term.* Exposition and argumentation are the discourse forms studied in this term. Each student is expected to write at least one good exposition and argument.

In both the second and the third terms a careful analysis is made of different kinds of literary discourse, masterpieces of our best writers being used so far as practicable. In this way the student becomes acquainted with rhetorical principles in their concrete embodiment, and forms a good standard by which to judge his own writing.

Genung's "Practical Rhetoric" is used in the second and third terms.

MARY J. ANDERSON,  
*Acting Head of Department.*

## MISCELLANEOUS INFORMATION.

## HISTORICAL SKETCH.

The act of the General Assembly which created the Indiana State Normal School was approved December 20, 1865. This act defined the object of the school, provided for the appointment of a board of trustees, the location of the buildings, the organization of a training school and the adoption of courses of study, and created the Normal School fund for the maintenance of the institution. The act further required the trustees to locate the school at the town or city of the State that should obligate itself to give the largest amount in cash or buildings and grounds to secure the school. The city of Terre Haute was the only place to offer any inducement to secure the institution. A tract of ground three hundred feet square near the center of the city and \$50,000 in cash were offered. This offer was accepted, and the construction of the building was begun. Aided by subsequent legislative appropriations, the trustees were able to complete the building partially, and the school was opened January 6, 1870. The professional training of teachers was an experiment in Indiana, and the institution began its work without the confidence and united support of the people of the State. Twenty-three students were present on the opening day, and this number increased to forty by the end of the term. The attendance has grown steadily since the opening of the school, and during the year ending June 30, 1894, 1,330 students were enrolled. In 1887 the school had become so large that it was necessary for the city high school of Terre Haute, which had occupied a portion of the building since its completion, to find new quarters, thus leaving the entire building of three stories to be occupied by the Normal School alone.

On the forenoon of April 9, 1888, the building and its contents were almost totally destroyed by fire. Only the foundations were left unimpaired; the library, furniture, apparatus and everything in the building—the accumulation of eighteen years—were consumed. Terre Haute provided temporary

quarters for the school, and promptly gave \$50,000 in cash with which to begin the work of rebuilding. The next General Assembly appropriated \$100,000 for the completion of the building and the purchase of a new library, etc. As a result, the school has at present a commodious and beautiful building and an equipment in every department much superior to that possessed before the fire.

The last Legislature appropriated \$40,000 for the construction of a new building to be used for gymnasia, library and laboratories. This new addition, when completed, will add very materially to the facilities of the institution for the prosecution of its work.

The attendance during the spring term of the current year is very large, there being eleven hundred and eighty-three different young men and women in actual attendance.

#### CONDITIONS OF ADMISSION.

*First.* Sixteen years of age, if females, and eighteen, if males.

*Second.* Good health.

*Third.* Satisfactory evidence of undoubted moral character.

*Fourth.* A pledge that the applicant will, if practicable, teach in the common schools of Indiana, a period equal to twice that spent as a student in the Normal School.

*Fifth.* A fair knowledge of the following subjects: Spelling, Writing, Reading, English Grammar, Geography, United States History, Physiology and Arithmetic.

NOTE—Persons holding a one year's, two years' or three years' license will be admitted without examination

*Sixth.* Persons entering for the first time are required to present a statement from some reputable and well-known citizen of the State, to the effect that the applicant is a person of good moral character.

#### CERTIFICATES AND DIPLOMAS.

Section 4557 of the school law of Indiana reads as follows: "The board of trustees is authorized to grant, from time to time, certificates of proficiency to such teachers as shall have completed any of the prescribed courses of study, and whose

moral character and disciplinary relations to the school shall be satisfactory. At the expiration of two years after graduation, satisfactory evidence of professional ability to instruct and manage a school having been received, they shall be entitled to diplomas appropriate to such professional degrees as the trustees shall confer upon them, which diploma shall be considered sufficient evidence of qualification to teach in any of the schools of the State."

Graduates who make application for diplomas under the above provisions of the law are required to produce certificates of their success in instruction and school management, and as to the time taught, from county superintendents, township trustees, superintendents of graded schools of towns or cities or from corporation school trustees.

By a rule of the board of trustees, satisfactory evidence of twelve months' successful experience in teaching, after completing the course of study, entitles the graduate to the diploma of the institution.

As a means of promoting still greater thoroughness on the part of those nearing graduation from the school, the board of trustees, by a recent action, requires "that all candidates for graduation from the Normal School shall be required to hold a county license to teach for a period of not less than two years; said license having been issued within the five years next preceding the date of commencement for the given year. Or that such person shall receive a grade in an examination conducted by the faculty on the questions used in the county examination that would entitle them to a license for not less than two years, if the examination were taken under a county superintendent."

#### DISCIPLINE OF THE SCHOOL.

The end of all school government and discipline, intelligently conceived and administered, is the rational self-control and self-direction of the pupil. This is to be the outcome in the pupil. The effort is made to derive all rules of government from the inherent nature and purposes of the organization itself. This is the true basis of such rules; from this alone they derive their

authority, and not from the teacher's will and utterance. A system of school regulations, which aims only at arbitrary restraint, without leading the pupil to order his conduct by clearly conceived principles of right doing, lacks the most essential educative qualities. The formation of correct habits of thought and action, the development of worthy character, these are the true aims of school discipline. The discipline of the Normal School is administered in this general thought and spirit. Students are led to see the reasonableness of the requirements made of them, so that their obedience may be intelligent and educative. In respect to discipline, as in all other particulars, the Normal School seeks to make itself in fact what it must be by definition—a model school.

#### EXPENSES.

Board, including fuel and light, can be had in good families at \$3.50 to \$5 per week, according to quality of accommodations. There are good facilities for self-boarding, and for club-boarding in the city at a cost of \$2.50 to \$3.50 per week. Nearly all the students board in clubs, thus reducing their entire expenses to \$3 per week for good accommodations. The expenses of many do not exceed \$2.50 per week. The only charge made by the school is a library fee of \$1 per term.

The necessary expenses for a year in the Normal School will not vary greatly from the following estimate:

|                                       |         |
|---------------------------------------|---------|
| Room rent, 40 weeks, at \$1 . . . . . | \$40 00 |
| Board, 40 weeks, at \$2 . . . . .     | 80 00   |
| Fuel and lights . . . . .             | 7 50    |
| Washing and incidentals . . . . .     | 25 00   |
| Library fee, \$1 per term . . . . .   | 3 00    |
| Books and stationery . . . . .        | 15 00   |

---

Necessary expenses for one year, 40 weeks . . . . \$170 00

## SPECIAL CLASSES IN SPRING TERM.

Many teachers of experience and good scholarship desire to spend one term in reviewing certain subjects which they are required to teach, or in pursuing certain professional studies, and yet are precluded from taking an extended course of study in any institution. Some of these are the leading teachers in their respective counties. They are prevented from pursuing a systematic course of study by being under the necessity of teaching during the fall and winter. To such persons of mature years, experience in teaching, who hold a high grade of license, and who enter the Normal School for the spring term only, the privilege of taking a special course will be accorded. For the benefit of these, special classes will be organized, if necessary, in Mental Science, Methods, Observation in Training Schools, Science of Education, U. S. History, Algebra and Physiology.

## ADVANCED STANDING BY EXAMINATION.

The Normal School is authorized to give a formal credit on its course to three classes of students only, namely: (1) College graduates; (2) graduates of commissioned high schools; and (3) those persons holding one or more three years' licenses. These are all admitted without examination.

Persons not included in the above named classes, and wishing to be excused from the study of any subjects in the course, are required to pass through satisfactory examinations in such subjects. Effort is made to give every person full credit for all knowledge of subjects possessed on entering, and to assist him to advance as rapidly and to graduate as soon as is consistent with a thorough teacher's knowledge of the subjects studied.

Examinations conducted for passing persons out of given subjects without detailed study of these in the school are made thorough, extended and professional in character. The object is not simply to test the applicant's knowledge of the subject in its academic aspects, but to ascertain what he knows of it from a teacher's point of view. The psychology of the subject, its method and its educational value are considered in these examinations.

## SUMMER TERM OF SCIENCE.

To the regular three terms of the school year there has recently been added a summer term, in which the bulk of the work offered is science work. This summer work is offered in response to repeated inquiries from teachers who wish to spend their summer vacation in such study. The term begins the Tuesday following commencement day and continues five weeks. On Saturdays the work closes at noon. The tuition for any or all privileges of this term is ten dollars, payable on entering. There is no other charge of any kind in either the laboratories or library, except in cases of breakage in chemistry. The work offered is the regular Normal School work, and credits for the same are given on the regular Normal School course of study. Persons desiring credits for this work will spend their entire time on any two of the courses offered and if satisfactorily done, will receive a *full* term credit in each of the courses taken.

The courses offered will embrace physics, chemistry, botany, zoölogy, human physiology and psychology, both experimental and introspective. These courses being the same as those offered in the regular terms, their description will be found in their respective places in the catalogue.

All of the summer classes are under the personal direction of the regular teachers of the subjects offered. The library will be open at such regular periods as to secure to all students the fullest opportunities for reading and reference.

Persons desiring additional information concerning the Summer Term of Science may secure the same by addressing either,

ROBERT G. GILLUM,  
L. J. RETTGER,  
F. M. STALKER.

## YOUNG MEN'S AND YOUNG WOMEN'S CHRISTIAN ASSOCIATION.

These organizations are engaged in similar lines of work, uniting only in that which can be done most effectually by such union.

The purpose of the associations is distinctively religious—to aid in the development of the Christian character of their members, to advance the moral and spiritual element of the school, and to lead the students into aggressive Christian work. Included in the membership are the leading members of the Normal and the faculty. This effort of the Christian students to elevate the moral, social and spiritual life of the students, has the hearty support and co-operation of the faculty and board of trustees.

Located on the fourth floor of the building is the association room, beautifully furnished and devoted exclusively to the work of these organizations. Each association holds a mid-week prayer meeting, and on Saturday a joint meeting is devoted to the discussion of some timely topic, religious or moral.

The field of work is shown somewhat by the fact that the following committees carry on the organized work: Bible study, religious meetings, social, finance, membership, literature, inter-collegiate, missionary, visiting, music and room.

At the beginning of the fall and spring terms, a "Student's Campaign" is conducted by the members of the associations, the object of which is to welcome new students and to assist voluntarily in securing rooms, board and other needed information.

These organizations are recommended to all students of the Normal.

## ENTRANCE EXAMINATION.

The following questions on the common school branches were used with the entering students at the opening of the spring term, April 3, 1894, and may be regarded as fair examples of the questions submitted in the entrance examinations from term to term :

### UNITED STATES HISTORY.

1. In what particulars is the present Constitution different from the Articles of Confederation?
2. Name several of the most important factors which have tended to unify the people of the United States.
3. What is meant by the loose construction of the Constitution? Give two clauses of the Constitution which have given rise to loose construction of the Constitution.
4. Give the importance in American history of the "Dred Scott Decision."
5. Give some important results of the Civil War.

### ARITHMETIC.

1. What is a denominative number? Reduce 10 ft. to the fraction of a mile.
2. Which is the greater fraction,  $\frac{11}{41}$  or  $\frac{25}{113}$ ? Show work.
3. If ten men can do a piece of work in 15 days, how long will it take 25 men?
4. A merchant sent his agent \$800 with which to buy goods. If the agent took his commission at 2 % out of the money how many dollars' worth of goods did he buy?
5. What are the proceeds of a sixty days note discounted at 8 %, the face of the note being \$1,000?
6. How many yards of carpet, one yard wide, must I buy for a room 20 ft. long and 16 ft. wide, if the strips run lengthwise?

## PHYSIOLOGY.

1. Describe the structure and function of the red corpuscles of blood.
2. How does the lymph get back to the heart?
3. What action does the pancreatic juice exert in the process of digestion.
4. Describe the spinal cord.
5. How is the crystalline lense adjusted to see far and near?
6. Describe the events of a complete beat of the heart.

## GEOGRAPHY.

1. What are the poles? The equator? Parallels? Meridians?
2. Name in order from east to west the countries crossed by the parallel of 40° north latitude.
3. Name and bound the oceans.
4. Locate the following peninsulas: Arabia, Cape Cod, Florida, Greece, India, Italy, Kamchatka, Korea, Nova Scotia, Yucatan.
5. Name in order from east to west the bodies of land and water crossed by the equator.
6. Name and bound the grand divisions.

(Answer any five.)

## READING.

1. What is reading?
2. Of what importance do you consider reading in comparison with the other legal branches?
3. What is the use of punctuation?
4. Which do you consider of greater importance, power to get the thought from a selection, or skill in oral expression? Why?
5. What very close and necessary connection exists between thought reading and oral reading?

6. Name five American literary writers, and one or more writings of each.

7. What is the chief advantage to be gained by reading such books as those mentioned above?

(Answer any five.)

GRAMMAR.

1. Correct these sentences, giving reasons: (a.) Set down and rest. (b.) I done as well as I could do.

2. Tell what part of speech *what* is in each of these sentences: (a.) What! art thou still unsatisfied? (b.) What are you doing? (c.) What we possessed, was taken.

3. Give the plurals of these nouns: radius, brother-in-law, deer, chimney.

4. Analyze or diagram: Between the mountains lies a fertile valley.

5. Decline I, thou, who, man.

## Report of Board of Visitors.

---

The board of official visitors to the school for the academic year 1892-93 consisted of the following: George M. Grant, president Queen's College, Kingston, Ontario; R. I. Hamilton, superintendent schools, Huntington, Ind., and W. B. Black, superintendent schools, Jackson County, Indiana. Following is the board's report:

*To the Board of Trustees of the Indiana State Normal School:*

GENTLEMEN—Having accepted the appointment to visit the State Normal School at Terre Haute, witness the exercises, and otherwise inspect its condition, we discharged the duty last month, giving several days to it and finding great enjoyment in the work. The president and the members of the staff rendered every assistance to enable us to make the inspection complete.

Normal Schools are of two kinds, according to the public system of education in different countries, or the stage of development, which the system has attained. In the Province of Ontario no person can be engaged as a public school teacher unless he has a Provincial Normal School certificate, but the training in the Normal School is confined to professional or pedagogical subjects, such as the history of education, the science of education, school organization and management, methods of teaching and practical teaching. There is also a final examination on "Temperance and Hygiene, Agriculture, Reading, Writing, Drawing, Music, Drill and Calisthenics." The pupils are expected to acquire the general scholarship and culture demanded by the Department of Education, in the Model Schools, High Schools, Collegiate Institutes, colleges and universities of the Province. One year's attendance at the Normal School is all that is required. In Scotland, on the contrary, Normal Schools undertake to give general scholarship, as well as teach professional methods, though all subjects are taught from a pedagogical point of view; that is, the student acquires knowledge, not for its own sake, but with an object in view, and that object is to teach it to others, and especially to immature minds. The Indiana State Normal School is of the Scottish and not of the Canadian type. Inasmuch as it is situated in a city where there is no university whose classes the student might attend, the Scottish is certainly the better type for Indiana to follow; and as the school in Terre Haute has organized a one year's course for those university graduates who wish to enter the teaching profession and who feel the need of professional training, there is no unnecessary

overlapping of State work, while the needs of that large class who can not take a regular college course are met. It is evident that a Normal School of this kind must be a much more extensive and expensive institution than one on the Ontario plan. The usual course must be for four years, instead of one year. A staff of at least twenty instead of three or four is needed, and the personnel of the staff ought to be of the same class as that from which college professors are taken. A library as encyclopedic in range as a university library is needed. There must also be good laboratories, museum, apparatus, gymnasium and other equipments. The aim is to make the pupils scholars as well as teachers; to give them some appreciation of the elements of art, particularly of music and drawing, and to enable them to teach good manners and sound morals, as well as intellectual disciplines; and that they may do all this successfully, they must be in themselves examples and inspirations to those who are to be committed to their charge. In an institution of this kind also the position of the president is one of peculiar difficulty and responsibility, and if he has a special department to teach, as well as the oversight of the whole, a combination of qualities is required that is seldom found in a single person. Yet the person must be found, for weakness here, either in intellectual or moral power, or in tact and administrative capacity, would soon be followed by confusion and paralysis everywhere.

We inspected the school with our eyes open to its scope and purpose, and we now beg leave to report that we found it, speaking generally, in a first-class condition, and with the prospect of soon being able to do its work better, when the addition to the building, which has been partially provided for, has been completed and equipped, in accordance with the plans of the board of trustees.

The first thing that a visitor notes is the spirit of the students. They have come to work and not to idle away a part of their lives, and there is consequently a general earnestness that makes discipline easy. Not the slightest sign of friction can be detected either in the class rooms or in the working of the organization. The importance of this can not be overestimated, for young men and women learn quite as much from their fellow students as from their professors. Besides, it makes them study from the first day of the term, instead of putting off from week to week, and then attempting to do three months' work in one. This accounts, too, in part, no doubt, for the good state of health in which they seem to be. Regular study hurts neither man nor woman. Quite the contrary. But periods of idleness alternating with periods of labor at high pressure, and for too many hours a day, result in shattering nerves or the break-down of the whole system.

The next thing noted was the method of instruction universally followed. Instead of lecturing, the Socratic or semi-Socratic method is

adopted. This method requires thoroughness as regards knowledge of his subject on the part of the teacher, as well as intellectual readiness, and a sympathy that enables him to enter into the mental condition and see the point of view of the pupil; and it demands, on the part of the pupil, a desire to learn sufficiently absorbing to destroy the self-consciousness that makes us all afraid to answer questions lest we display our ignorance and be laughed at for our mistakes. If these conditions are not present, the class hour may be wasted and the pupils learn little except that their instructor can be confused or drawn off from his subject, or that some of their fellows are in a fog. It is the true method, notwithstanding, and it is followed in the Normal School intelligently and with a large measure of success.

It is unnecessary to go into the work of the different departments of the school in detail, but we can not avoid commending the spirit with which the instructors in science conduct their work in their present unsuitable quarters and with inadequate equipment. They will appreciate all the more the conditions in which they expect soon to find themselves in the new building. The library is a model, as regards classification of books and arrangement; still more because of the extent to which it is used as a workshop by the students. If it be true, as Carlyle says: "That the best modern university is the best collection of books," then nothing is more needed in every institution of learning than a complete collection of the best authors, facilities for utilizing it, and guidance. The collection of books, considering that it has been made in four years, is very good. It is better, too, to add 1,500 volumes yearly than to purchase 15,000 at once. The field of the knowable is extending daily, and new editions of old works are continually called for to bring them up to date. But what is more needed than a large collection is the throwing of it open to all likely to profit by it, with such guidance that the student, instead of being lost as in a vast forest, learns easily how to find his way and to lay his hand on the book that he most needs. We also approve of the change that has been made in assigning two terms in instruction in music and in drawing instead of one. The children of the State should be taught to sing together, and they can be taught only in the public schools. To secure this the teachers themselves must first be taught. We heartily congratulate the State of Indiana on the efficiency of its public Normal School.

Respectfully submitted,

GEORGE M. GRANT,  
R. I. HAMILTON,  
W. B. BLACK.

May, 1893.

Persons wishing further information are requested to address  
President State Normal School, Terre Haute, Indiana.

## LIST OF GRADUATES.

---

### CLASS OF 1872.

Louise Barbour, Susan W. Barbour, Lessie Harrah, Mary A. Oakey, William W. Parsons, Mary B. (Powner) Hodgkiss, Howard Sandison, Fannie E. (Scott) Burt, Hattie Scott. Total, 9.

### CLASS OF 1873.

Mary O. (Andrews) Howard, Fannie (Bain) Salsich, Mary L. (Clark) Hewitt, Maggie Cox, Lucy (Delano) Hastings, Ada Glick, Lucy V. Gosney, Fannie (Hewitt) Simmons, Alice (Hodgin) Stephens, Albert T. Jaquith, Anna Mathews, Elisha B. Milam, S. S. Parr, Lida A. (Powers) Leisure, Michael Seiler, Charlotte J. Stimson, William, L. Welch, Mattie Woodard, Reba Woodard, Minnie (Young) Burress. Total, 20.

### CLASS OF 1874.

Mattie (Bennett) Adams, Alice (Crandell) Graff, Mattie (Curl) Dennis, James W. French, Mattie Harris, Sarah E. Pierce, Thomas S. Price, Lawrence W. Stewart, Amy E. Wales, Ruama W. Wales, Sarah H. (McCann) Wallace, John Williamson. Total, 12.

### CLASS OF 1875.

Nancy (Bowman) Fleming, Jane Chase, Rudolph B. Davis, John Donaldson, Arrie M. (Freeland) Polk, Benjamin A. Ogden, John A. Paddock, Isreal Youngblood. Total, 8.

### CLASS OF 1876.

Virginia K. (Allen) Pollard, James C. Black, Emma E. (Carter) Reed, Ada F. (Hall) Sammis, Rosanna P. Lindsay, William H. Mace, Harriet E. (Naylor) Robbins, Alice R. Palmer, Jonathan Perigo, T. Homer Taylor. Total, 10.

### CLASS OF 1877.

Charles E. Bickmore, Alma J. (Boore) Carpenter, Oliva Bradshaw, Albert E. Humke, Marcia Mitchell, Annie Moore, Sarah E. (Oosley) Gardner, William B. Woods. Total, 8.

## CLASS OF 1878.

Lorenzo D. Barnes, Addie Brown, Ella (Burke) Nicholson, Morgan Caraway, Lizzie K. Chamness, Ida (Dodson) Mace, Joseph H. Ewbank, Francis Harris, Charles E. Harrison, Cora Hill, Rachel King, Kate Purdy, Alpheus Reynolds, Alice Rupp, Sallie Scott, Mary G. Taylor. Total, 16.

## CLASS OF 1879.

Eugene B. Bradshaw, Josephine Boyd, Ettie Crowe, Mary E. (DeLaBar) Swain, George Grosjean, Samuel M. Hutzel, Oscar L. Kelso, Samuel P. McCrear, Harriet E. (Miller) Stinson, Joseph Studebaker, Ruth (Woodward) Newsome. Total, 11.

## CLASS OF 1880.

Emily (Barnett) Coble, Wilson H. Cox, Lydia Dwiggins, Caroline (Furber) Swain, Charles F. Fox, Margaret Gamble, Jasper Goodykoontz, Ruth Gentry, Elwood W. Kemp, Mary E. (King) Warren, Clova A. Lawrence, William R. Mail, Arnold Tompkins, Jane S. Tompkins, Malissa (Vanduyne) Mitchell, Harriet (Wilkes) Parsons. Total, 16.

## CLASS OF 1881.

Mary J. Anderson, Lillie (Buck) Lawler, Mrs. Fannie Beach, George W. Cox, Mary M. (Carter) Hendricks, Lillie Gray, Ella (Goodsell) Appleman, L. B. Griffin, A. W. Hadley, Mary E. (Hathaway) Ragan, Charles E. Hodgkin, Ida G. Jordan, William D. Kerlin, Elijah I. Kerlin, Maggie Lawrence, Luella (Long) Farley, Mattie J. (McConnell) Denny, Mary V. Mustard, S. B. McCracken, Sallie (Overman) Hodgkin, Eugene Patterson, James B. Ragan, Jennie Throop, Helen (Weiss) Mansar. Total, 24.

## CLASS OF 1882.

Emma (Adams) Trueblood, William B. Creagar, G. H. Caraway, Ella Dwiggins, A. E. Davison, W. S. Domer, S. C. Fulmer, H. W. Graham, C. F. Grosjean, E. M. C. Hobbs, Laura Kesler, L. C. Lawrence, J. A. Mitchell, Z. B. McClure, Bailey Martin, A. E. Mowrer, Lizzie Mohler, Rose Murphy, D. M. Nelson, Catherine O'Neill, A. A. Parker, Fannie A. (Rhode) Cobb, M. Frances (Rhode) McCord, Hattie (Rhea) Mason, Mary M. Smith, H. B. Shafer, Mary (Trueblood) Hadley, Emogene A. (Turner) Mowrer, Minnie L. Wagner, A. J. Whiteleather. Total, 30.

## CLASS OF 1883.

P. H. Kirsh, J. H. Tomlin, Rose (Alexander) Pickering, Edith (Austin) Gillette, James M. Brown, C. W. Crouse, Mary B. Cox, Hattie (Cutter) Harris, Katie Campbell, Lizzie (Campbell) McNeill, Albert R. Charman, George W. Dealand, Mary Foley, Biddie P. Hall, Mary E. (Jurgens) Nusbaum, C. A. Jackson, Emily Keith, Ella Lindley, Mary McArthur, Carrie D. Monical, E. M. Morrison, Laura Ray, Lena (Sheets) Martin, Eugenie Scott, J. M. Stephenson, H. M. Smith, Clara Van Nuys, Mary Van Nuys, P. V. Voris, W. O. Warrick, Mattie L. Williams, W. H. Warvel, Edith (Williams) Warrick, Ida Westfall, Lola (Young) Hay. Total, 35.

## CLASS OF 1884.

B. S. Aikman, W. H. Ashley, Mary C. (Bowen) Jewel, Della (Carson) Cresswell, Emma Cox, C. M. Carpenter, Mary J. (Cox) Dexter, Maggie M. Champer, Annette Farris, Mary E. (Foulke) Stewart, Alma Gossett, Alice Hadley, Margaret M. (Hill) McHarter, F. G. Haecker, Jennie (Hadley) Wing, Frank Haines, George C. Hubbard, Clara A. (Hurst) Layne, Jesse Lewis, Mattie C. (Lindley) Commons, Martha A. (Lindley) Jackson, B. F. Moore, Caroline E. (Moodey) McFerrin, G. M. Naber, Louise (Severin) Davis, T. J. Shea, Hattie Sheets, Mary (Severinghaus) Schnider, J. W. F. Smith, Aura E. (Smith) Walls, Hattie Stuart, Sarah E. (Tarney) Campbell. Total, 32.

## CLASS OF 1885.

W. E. Alexander, A. Brinkerhoff, Jennie Blasdel, Fannie Batty, Ella (Chappell) Sleeper, Alexander Caldwell, O. T. Dunagan, Chase O. DuBois, John F. Engle, Jessie (Fuller) Alexander, J. T. Graves, Dora Hope, A. C. Hunnicut, Nannie Hunter, J. M. D. Hudelson, Elmer Henry, F. S. Morganthaler, Milo W. Nethercutt, W. R. Nesbit, C. F. Suter, Marion Taylor, Geo. W. Thompson, A. B. Ulrey, Eva Wingate, James B. Wisely. Total, 25.

## CLASS OF 1886.

T. D. Aker, Maynette Austin, C. D. Berry, Bertha (Burdick) Purdue, Violet (Bowman) Bowman, Anna Baker, Josephine Cox, Orville E. Connor, J. T. Clifford, L. O. Dale, Samuel Duvall, Alice Farnham, Mary (Griffin) Webb, Minnie (Gard) Rettger, Lizzie Hawley, Mary E. (Lindley) Cox, Emma (Morris) McKeever, Emma Millington, A. H. Purdue, Louis Rettger, John Snyder, Clara Snyder, Everett Shepardson, Carrie Tryon, Clara Wright, William Whitaker, Lydia Whitaker, Anna Wood. Total, 28.

## CLASS OF 1887.

J. P. Brunton, Myrtle Burdick, Mary Barth, Eugene Bohannon, J. W. Bateman. Mary S. Blasdel, Harriet Casper, Oscar Chrisman, Carrie Culbertson, Maggie (Dilling) Lawson, Inez V. Elliott, Jennie Garrott, Flora Love, Maggie (McNaughton) Miller, Ida B. Moore, Hiram Monical, Katie (Mehan) Cox, Lenora Pound, Lillie Powell, C. E. Remsburg, J. N. Spangler, Mary L. Taylor, Lida Thompson, Anna (Williamson) Griffith, Julia Woodruff, Alonzo Yates. Total, 26.

## CLASS OF 1888.

Marie Alexander, Melville D. Avery, Olive Batman, Ambrose Blasdel, Emma L. Butler, Gertrude (Boring) Ehrman, Lelia Brouillette, Harriet (Brown) Mail, Nellie Ballard, Frank Cornell, Eva Chester, Sallie Craig, William J. Davis, B. F. Deahl, Allie Davidson; Mattie Glick, W. B. Henwood, Carrie Harter, Nellie B. Harris, Emily Hawtin, O. B. Hultz, George M. Hoffman, Mary Hawkins, Mary Ketzenbach, Nellie Love, J. W. Love, Mary Lewis, J. R. Lytle, Elizabeth Mavity, J. Winnie O'Dell, Annie Olcott, James L. Price, Walter M. Pavey, Louise Peters, J. M. Robinson, S. E. Raines, Anna G. Scott, W. H. Sanders, O. L. Voris, Maggie Wisely, Bessie Wright. Total, 41.

## CLASS OF 1889.

Orville Apple, Elmer Bryan, Charlotte L. Ball, J. C. Cunningham, W. E. Clapham, U. O. Cox, Annie B. Collins, Belle Culbertson, Edwin F. Dyer, Alilian Daniel, Mattie (Dowdall) Auken, Anna (Edmonds) DeLay, Mattie L. Geckler, Lucius R. Hudleson, Mary Henry, Mary Johnson, Mary P. Jaquess, Emma Jennings, Louis Kreke, Jessie Keith, F. J. Lahr, Ida Lawrence, William G. Law, Charles E. Morris, A. E. Malsbary, Aaron Mow, Dora Mitchell, Frank Mitchell, Louise (Myer) Wood, Amanda McCombs, Cornelia Palmer, Lydia E. Pike, Emma Robinson, Rosa Reiss, J. W. Smith, J. R. Slonaker, J. M. Tilley, Charles J. Waits, Charles A. Wilson, Melville S. Woods, A. J. Woolman, Mamie Wiley, Emma Woodard, John A. Wood. Total, 44.

## CLASS OF 1890.

W. H. Aufer, Harriet Bardsley, E. G. Bauman, Elizabeth Betcher, J. L. Birlingmier, Elvinnett Brown, Carrie Colvin, Bessie (Cushing) Ridgley, John M. Culver, Irena Christian, Eugene Evans, R. F. Evans, Belle (Farquar) Remsberg, Thomas F. Fitzgibbon, Etta M. Foltz, Thos. Frazee, W. D. Hamer, Mary Hargrave, Laura (Harlan) Hoover, Penina (Hill) Wilson, Anna (Headen) Erskine, Joseph L. Harter, Flora Hartley, Joseph M. Johnston, Annette Keeley, W. J. Maxwell, Alice Mertz, Belle Mills, Addie (Moore) Fitzgibbon, Mary Moran, John E. McCloud, Hannah (Payton) Hamer, Geo. W. Plackard, Laura (Rathfon) Fischer, Cloud Rutter, Emma Snoddy, Robert A. Troth, Annie Thomas, W. S. Tipton, John Valentine, Lizzie Vickery. Total, 40.

## CLASS OF 1891.

Lillian H. Austin, Sallie (Brown) McLaughlin, Mary F. (Beardsley) Ringle, Ira F. Baldwin, Alice Beckman, Burnside Clapham, Eva Chamberlain, Charles H. Copeland, Rose M. Cox, Cora M. Dodson, Minnie B. Ellis, Mary C. Frazee, W. A. Furr, Rose H. Forman, C. A. Freeman, Lucy M. Hatch, Calvin S. Hoover, Evelyn Haskin, Sarah A. Lindley, Ella M. Lyons, Dora Michener, Margaret Michener, Frances M. Newton, Rose Newkom, Emilie Newkom, Mary Oglevee, Harriett Powell, J. D. Reeve, Alfred Raber, D. C. Ridgley, Ernst W. Rettger, Mable Sanders, Elmer E. Slick, Julia S. Tripp, A. E. Tower, Anna Trueblood. Total, 36.

## CLASS OF 1892.

Sarah E. Adams, Caddie Bond, Burton B. Berry, Martha Biegler, William W. Black, Sallie Bodemer, Lucy Brokaw, Emma Buntin, J. D. Collins, Effie Cooper, Theodore F. Curtis, C. E. Dudley, Frank W. Ellis, John Faught, Laura Frazee, Orville P. Foreman, Minnie Gilman, S. S. Goblin, Callie Harlan, Winifred Harris, Noble Harter, May Henry, J. W. Hesler, H. S. Hippensteel, S. A. Hughes, Charles E. Keim, Mamie Kelly, C. A. King, Alice Knause, Alice Lamb, Mabel Lyon, Willard E. Miller, William J. Moenkhaus, Kate Moran, Daniel Moran, C. F. McIntosh, Wallace Neet, D. T. Powers, Margaret Randolph, Thomas Roush, Minnie Rundell, I. B. Seagly, Ora Shoemaker, J. R. Sparks, Myrtle Taylor, Clara (Torr) Tompkins, William V. Troth, J. H. Voris, Lissa Waldron, Laura Walker, Mary Walkup, May Wallace, N. G. Wark, L. E. Wheeler, W. M. Whigam. Total, 55.

## CLASS OF 1893.

J. S. Benham, Olive Beroth, W. J. Bowden, O. H. Bowman, Rozzie M. Brown, Dollie Bufink, Flora Burke, Nina Coltrin, Mary Coltrin, Bertha Carter, H. N. Coffman, W. E. Carroon, Walter Dunn, E. E. Davis, Daniel Deeg, Etta H. DeLay, Anna Froeb, Louise Freudenreich, Mary E. Ferguson, Gusta Felbaum, Tillie Felbaum, A. O. Fulkerson, Cora D. Gillette, Flora Gourley, H. S. Gilhams, G. W. Gayler, M. B. Griffith, J. W. Heath, George H. Hansell, N. C. Heironimus, Ginevra Huffman, Brainard Hooker, Samuel E. Harwood, Eva Johnson, Matilda Kalmbach, Anna Lang, Elizabeth Lawrence, Eunice Little, C. H. Mauntel, Kate Mavity, J. T. McManis, D. W. Nelson, Grace Norwood, Anna Odle, W. A. Oliphant, Samuel B. Plasket, Effie M. Preston, Milton W. Rothert, Jennie Randolph, Emma Solomon, Harry G. Strawn, Joseph W. Strain, Lena M. Steward, C. M. Shafor, J. H. Scholl, Getty VanBuskirk, J. T. Worsham, William Wallace, Elizabeth Wilson, Ostin L. Woolley, A. C. Woolley, Susie P. Wilson, Anna R. Ward, Laura Wharry, Mary V. Walsh, A. C. Yoder, P. A. Yoder, J. V. Zartman. Total, 68.
